PROFESSIONAL SUMMARY

AI/ML-focused Computer Science undergraduate with hands-on expertise in Machine Learning, Computer Vision, Natural Language Processing, and Full-Stack development. Experienced in building AI-powered applications, deploying ML models, and developing scalable web platforms using React, Node.js and FastAPI.

EDUCATION

2023 – Present	Bachelor's Degree (CSE - AIML) at Vellore Institute of Technology	(CGPA: 8.77/10)
2022 – 2023	Class 12th TSBIE at Sri Chaitanya Junior College	(Score: 89.6/100)
2020 – 2021	Class 10th CBSE at Jawahar Navodaya Vidyalaya Ranga Reddy	(Score: 90.8/100)

TECHNICAL SKILLS

AI/ML	Machine Learning, Deep Learning (CNNs, DNNs, Computer Vision, NLP, Generative AI, Transformers (BART/GPT), OpenAI's Whisper, TensorFlow, PyTorch, Scikit-learn)
Web Development	React.js, Tailwind CSS, Next.js, Node.js, Vite, Django
Programming	C++, Python, Java, HTML5/CSS3, JavaScript, SQL
Tools	Cursor, Vercel, Hugging-Face, Antigravity, Anthropic, Codex-OpenAI, Git, Gemini, Firebase, Render, Railway, Local LLMs

EXPERIENCE

Infosys

AIML Intern

Remote

Nov 2025 – Jan 2026

- Built an AI-powered podcast analysis system using Whisper, Sentence-BERT, and HuggingFace BART.
- Implemented topic segmentation using sentence embeddings and cosine similarity.
- Developed FastAPI backend and Streamlit/React interface for podcast transcription and summarization.

Yuga Yatra Pvt Ltd

SDE Intern

Remote

Oct 2025 – Dec 2025

- Contributed to backend development using modern web technologies (Next.js, React.js, TypeScript, JavaScript).
- Proposed and Assisted in designing the company's business models (FreshIn10, OldAgeHome.in)
- Collaborated with developers to implement full-stack features of the business models.
- Participated in daily brainstorming sessions and product discussions.

PROJECTS

PodC - An Automated Podcast Analyzer

React.js, FastAPI, Hugging-Face spaces, Vercel, OpenAI-Whisper, PyTorch

[Demo](#)

AI/ML Web App

- Built Speech-to-Text pipeline using OpenAI Whisper for Automatic Speech Recognition.
- Created sentence embeddings using Hugging Face Sentence-BERT (all-MiniLM-L6-v2).
- Performed topic segmentation using cosine similarity. Generated episodic summaries using Hugging Face BART-CNN.
- Developed the frontend using React.js, backend using FastAPI, and integrated Gemini 2.5 Flash for podcast Q&A.

Here is the Detailed link about the project:- [GitHub link of my project with details](#)

Bonanza - Banana Leaf Nutrient Deficiency Detector

Tensor-flow, FastAPI, Render, Vercel

[Demo](#)

AI/ML Web App

- Built a multi-class Banana leaf nutrient deficiency classifier using MobileNetV3 via Transfer learning.
- Used Tensorflow Lite runtime for light weight inference, easier deployment and lower RAM usage.
- Built a FastAPI backend for image preprocessing and TF Lite inference, returning predicted nutrient classes with confidence scores.
- Built the frontend using React.js and deployed the application using Vercel (frontend) and Render (backend).

Project Details: [Project Report with implementation details](#)

AI Integrated Smart Glasses for Visually Impaired

Raspberry Pi 4, YOLOv11n, pytsx3, TF-Luna LiDAR, pi-cam

[Implementation](#)

Hardware & IoT

- Built an AI-powered smart assistive device for visually impaired users using Raspberry Pi 4 and computer vision.
- Integrated YOLOv11n for real-time object detection and obstacle recognition through the Pi Camera.
- Implemented distance estimation using TF-Luna LiDAR and voice feedback using the pytsx3 text-to-speech engine.
- Designed an edge-based system capable of providing real-time environmental awareness without cloud dependency.

Project Details: [Project Report with implementation details](#)

CERTIFICATIONS

Oracle Generative AI Professional

Oracle — 2025

Oracle AI Foundations Associate

Oracle — 2025

Applied Machine Learning in Python

University of Michigan — 2025

Full Stack Web Development

Apna College — 2025
